The Micro Technology Association intends to analyse markets of specific importance, tap them jointly and use the VDMA network as a forum for a mutually beneficial dialogue between the players of the industry.

The member companies activities extend to the various nano/micro product markets and the specific markets for nano/micro production engineering.

- Creating the corporate tomorrow
Legal advice, corporate finance, Internet and e-business
- Networked thinking and networked actions
Representation of the value chain from components to the plant –
the industrial network in our sector
- Technology for humans
Optimising the basic conditions for innovations, innovation services, standardisation
- Europe and the world
European network, trade fairs and symposia

VDMA is the largest engineering association in Europe. VDMA is representative, service provider, and contact for about 3,000 German and European companies from the mechanical engineering sector. About 86 % of VDMA members are small and medium-sized enterprises. Two thirds employ even less than 100 people. Mechanical engineering companies employ 935,000 people in Germany. The total volume of sales amounts to €194 billion (2008) with an export share of 60 %.
