

nanoproofed® protection ClearView
Nanotechnology for your safety.

How does nanoproofed® protection
ClearView act?

Of what does the
nanoproofed® protection
ClearView set consist?

nanoproofed® protection ClearView consists of nanoparticles with components that combine fix with glass and others which repel rain, ice, snow and dirt. They are combined by means of glassy components which give the coating its hardness. These particles place themselves in an intelligent manner during application. The binding components wander to the glass surface and the anti-sticking components orient towards the air. This way of "self-organisation" builds an ultra-thin glassy coating.

What is Nanotechnology?

Nanotechnology deals with microscopically small structures. Experts talk about one of the "Key-Technologies" of the 21st Century, which will change our daily life considerably. Nanoparticles can be programmed in many different ways. That's how multifunctional characteristics are created. **nanoproofed®** is one of the first companies that has put on the market this product innovation on the basis of chemical nanotechnology.

nanoproofed® protection ClearView provides by means of the revolutionary nanotechnology a far better long lasting view. At high speed rain and snow simply bead from the glass reducing considerably the use of the windscreen wiper. Dirt, insects and ice no longer adhere fix to the car window; the glass can be cleaned considerably easier and the removal of ice represents no problem. The sealing is extremely long-lasting, depending on the handling up to a year or 30.000 km.

Field of application

nanoproofed® protection ClearView glass sealing has been developed specially for the glass in the automobile area. You can seal any car glass windows with **nanoproofed® protection ClearView**.

The glass cleaning set:

This set contains all you need for the sealing of your car glass window. If applied with due care it is sufficient to clean all the outer car windows

Content:

- **nanoproofed® protection ClearView** cleaner
- **nanoproofed® protection ClearView** sealing
- Cloth for the cleaning and applications
