nanoproofed® protection ClearView
The unique surface sealing

nanoproofed®
protection Clear View

More visibility - More safety!

- Increased safety due to long-lasting better visibility
- Make windscreen wiper unnecessary when driving at high speed
- Perceptible easier cleaning and removal of ice
- Extremely long-lasting due to the unique nanotechnology

German technical inspection association-Thüringen:
Certified proved effectiveness

What makes nanoproofed® glass sealing so unique?

nanoproofed® protection ClearView glass sealing is not to be mistaken for superficial protection films which do not have a long-lasting effect. On the contrary, **nanoproofed® protection ClearView** builds an ultra thin glassy film, which combines homogeneously with the glass and thus guaranties an extreme resistance. This even protects your glass against aggressive environmental impacts - naturally with a transparency of 100%.
