The companies NETZSCH-CONDUX Mahltechnik GmbH in Hanau, Germany, and NETZSCH-Feinmahltechnik GmbH with its headquarters in Selb, Germany, form up the Business Unit Grinding & Dispersing within the NETZSCH Group. Many years of experience, the daily contact with our customers and the consequent development work resulting in more than 100 patents secure the technical competence and represent the quality awareness of our Business Unit.

Our focus on process engineering know-how and the extensive machine portfolio, ranging from laboratory and production machines to complete production lines, is unique worldwide: custom made mixing, kneading and dispersing machines for low- to high-viscosity products as well as a large number of wet grinding systems for different grinding tasks even down to the nanometer range. We also have extensive experience in the treatment of dry products by cutting, fine grinding or classifying and a versatile line of impact mills, classifier and jet mills as well as fine cutting mills and high-efficiency fine classifiers.

Machines and systems manufactured by NETZSCH Grinding & Dispersing are mainly used for chemical products, inks and paints, pigments, inorganic materials/minerals, sealants and adhesives, ceramics as well as in life science for pharmaceutical, food or biotechnological applications.

The headquarters are located in Selb/Germany and Hanau/Germany. The modern, well-equipped grinding and dispersing application laboratories are located in Selb and Hanau (Germany), Exton (PA-USA), Tula (Russia) and Pomerode (Brazil). The machines and systems are manufactured in Tirschenreuth, Selb and Hanau in Germany and abroad in our manufacturing facilities in Brazil, Russia, China and the United States. Being part of the NETZSCH Group we offer a worldwide sales and service network for convenient customer service.
