## **CeNTech: Academic and Industrial Expertise**

With the aim to exploit the vast potential and multifaceted prospects of nanotechnological research, CeNTech in Münster was created as one of Europe's first centers for nanotechnology dedicated to direct selected ideas and results. A total area of 2.400 square metres are at the disposal of researchers from companies and several faculties of the University of Münster. Research and development at CeNTech focusses on nano-scale analysis and nanobiotechnology here in particular the use of nanomaterials for biological and medical applications.

## **Technology Transfer at CeNTech**

As the administrative, business oriented division, the CeNTech GmbH, provides the platform for entrepreneurs to further develop their research ideas into marketable products. As mediator between academic and corporate interests, the CeNTech GmbH assists industry partners in the development and improvement of new and existing products. CeNTech promotes the formation of start-up companies that originate from university research and supports the expansion of companies in the nanotechnology sector.

## **Core Activities of CeNTech**

- Scientific Excellence focussing on Nanoanalytics and Nanobiotechnology
- Training and Education
- Technology Transfer
- Patent processing and utilisation
- Start up consulting
- Participation in and coordination of national and international networks
- Coordination of network HiNanoAnalytics ([www.hinanoanalytics.de](http://www.hinanoanalytics.de))
