Company:

AxynTeC Dünnschichttechnik GmbH is a technology provider for surface treatments and thin film technology with two innovative techniques: Laserdeposition and Plasmainpax®. Based on these techniques AxynTeC offers material screenings, the development of customer specific coatings and processes as well as the corresponding coating systems including the process technology.

The customer gets a one-stop solution in thin film technology:

Products:

- low friction hard coatings (diamond like carbon, DLC)
- biocompatible surfaces
- oxide ceramics with special electrical, optical, magnetic and sensory properties
- thin PTFE-coatings
- ion implantation
- nanostructured multilayers and nanocomposites
- AXPLORER® – a unique tool for “Rapid Proto-Coating”
- Plasmainpax® – the new plasma technology

Applications:

- automotive
- engineering
- medical technology
- sensor technology
- superconducting technology
